DESIGN GALLERY

Traditional blue provides endless options.

Blue is an easy and classic color choice for the living room. Traditional blue isn't just a feel-good color because it will be serene and timeless for years to come

Deep green goes with everything.

Nature-inspired colors continue to trend.

Deep green can be incorporated into the room through plants, and there are plenty of decor choices that pair perfectly with the hue.

Consider a happy yellow sofa.

Creating a living room you'll love begins with choosing stunning colors "that aren't boring," such as a bright, happy yellow.
